

NACE CALGARY SECTION NEWS

News about corrosion and the corrosion industry three times a year for members of NACE International in the Calgary area.

2018 Northern Area Western Conference in Vancouver

Transporting Energy and Protecting our Environment

Safe and reliable transportation of energy products while protecting the environment is at the forefront of the energy industry. During the March conference industry experts presented on several subjects relating the transportation of energy, including corrosion control, construction practices, integrity management and environmental and regulatory compliance.

The conference also included a variety of leading edge exhibitors showcasing emerging technologies and services.

The 210 participants in this March conference also had several opportunities to mingle and network with peers during social events.

The technology tracks included Marine Corrosion, Cathodic Protection, Coatings and Asset Integrity management.

For those of you who were unable to attend the conference, **click here** to download the technical presentations.

NACE CALGARY BIENNIAL MEMBER SURVEY

Please take a few minutes to fill out our brief online survey. Your views and suggestions will be very helpful as we work to improve services to members.

And...the first 100 responders will be eligible for a draw for a \$100 Keg Gift card, so don't delay, just **click here** to have your say.

Thanks in advance for doing the survey!

Message from the Chair

It's amazing to think that it's already April!

Last year our golf course opened in March, but it looks like it will still be a while before we can get out there to enjoy our summer activities.

We have had some great events so far this year including technical lunches, courses and student events. More are coming soon, both social and technical. Keep your eye out on the website and your inbox for more on these events. We are also doing our member survey (every two years) and we would really appreciate your feedback so we can strive to serve you better.

You may have seen a few e-blasts recently from NACE Headquarters indicating that the self-nomination process for the online voting has begun. The next year term of volunteers officially begin on July 1. Part of the process this year involves having a nominating committee to select potential candidates for the Section Officer positions. The nominating committee has submitted these selections to Headquarters and they will be identified on the voting ballot as such.

I will be stepping down as the Committee Chair since I've completed my two year term. It has been a fantastic experience to lead the NACE Calgary section, but it's time for someone else to take the lead. The team will be in great hands with many dedicated, hardworking and energetic people that want to stay involved.

The nominating committee has selected the following candidates to be put forward to the membership during the election:

- Committee Chair: Laura Cardenas (currently Vice-Chair)
- Committee Vice-Chair: Craig Ball (currently Sponsorship Chair and Program Vice-Chair)
- Treasurer: Jennifer Dickason (currently Treasurer)
- Secretary: Erwin Gamboa (currently Secretary)

For those of you keeping track of Section Officer positions, you will notice that the Northern Area (NA) Trustee position is not listed above. Neil Park will be serving the last of his three year term as NA Trustee, so his position will not be listed on the ballot.

As always if you have any questions or comments, feel free to contact me or anyone else on the executive at any time.

Thanks,

J. Johnson

Events and Courses

Upcoming Events

- **Effective Facility/Pipeline Integrity Management: Do More with Less –**
Rocky Mountain House. May 30. Registration available soon.
- **NACE Calgary Annual Golf Tournament –** Friday, August 17, 2018
Save the date.
- **ASM / NACE Materials Camp for Teachers -** August 13-17, University of Calgary.
The camp will provide teachers with the tools, information, and insight to encourage students to pursue studies and careers in Science, Technology, Engineering, and Mathematics (STEM) as well as Materials and Corrosion. The only cost for these residential camps is transportation to and from the location.
- **ASM/NACE Materials Camp for Teachers**
July 9-13, McMaster University, Hamilton, Ontario

Recent Student Section Event

The NACE Calgary Student Section collaborated with the Petroleum and Energy Society at the University of Calgary to put on a Lunch and Learn in February to introduce students to the corrosion industry. The event was well attended and students appreciated the hands-on samples that Jana Johnson brought along to her talk. At the last technical talk of the semester held in March, students learned about Internal Current Transfer from Karl Shen from Inter Pipeline.

Upcoming Calgary Courses

- **Internal Corrosion for Pipelines - Advanced**
May 7-11, 2018
- **Protective Coating Specialist - PCS1 Basic Principles**
May 27 – May 29, 2018
- **Protective Coating Specialist - PCS2 Advanced**
May 30 – June 1, 2018

NACE Calgary
Annual Social
June 14, 2018
Palomino Smokehouse

 **NACE**[®] **Northern Area Western Conference**
INTERNATIONAL **Calgary, Alberta February 5-7, 2019**

This three-day conference will focus on corrosion and asset integrity management in oil and gas and other industries, and explore the integration of sustainable practices within the corrosion industry.

Conference planners are eager to bring together the corrosion community to explore and discuss the concepts of Materials Sustainability and Materials Stewardship within the Circular Economy as additional principles to consider within Corrosion Management best practices. The conference technical program will also include program tracks focusing on oil and gas corrosion, infrastructure corrosion, and many other topics. Save the dates, and watch for more information and request for technical papers in the coming months. Click here to visit the website.

Online Training

Continuing education is important to building and maintaining your career, but can be a challenge to schedule in your busy work week. For your convenience, NACE offers online training as a cost-effective and flexible method to enhance your corrosion knowledge. By taking a NACE eCourse, you can learn on your own time and at your own pace from work, home, or on the road.

There are several courses to choose from – here for example is the **Basic Corrosion Course**...

In the Basic Corrosion eCourse, you will learn the causes and types of corrosion, as well as how it can be identified, monitored, and controlled. The lecture and multimedia-based eCourse features on demand viewing and bookmarking capabilities that enable you to complete the course as your schedule allows. It also includes a downloadable course manual, audio narration with transcripts, interactive exercises, and knowledge checks throughout to test your comprehension of the material.

Click here to view a video on the Basic Corrosion Course.
